

Certify what you measure, govern what you cannot

(a) cannot certify the null space

true scene x_i

same bucket
 $Au = y_i$

feasible-wrong u

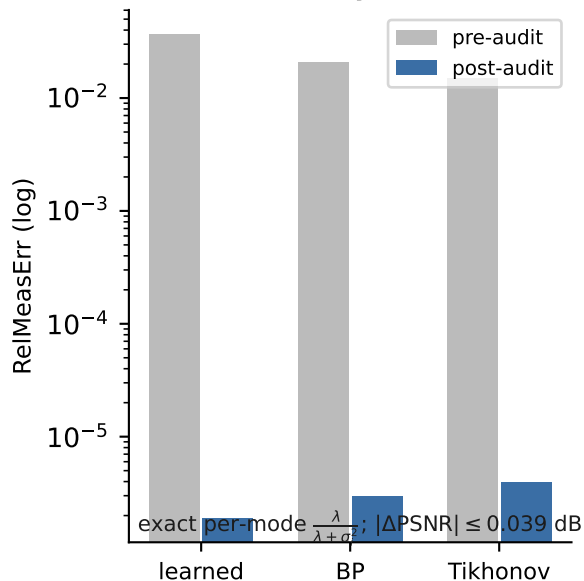

$$\frac{\|Au - y_i\|}{\|y_i\|} \approx 3e-13$$

(vs noise floor $\sim 10^{-3}$)

consistency \$
eq\$ correctness

(b) can certify what is measured

(c) therefore: govern the invention
